

ASSIGNMENT 2

Brand Identity, Product Design, Pricing, Positioning, and Customer Experience Plan

Zing & Zest Street Bites

Fresh. Fast. Full of Flavor.

University	University of Central Punjab (UCP)
Program / Department	BS Artificial Intelligence / Group Project
Course	Fundamentals of Marketing
Project Phase	Assignment 2 - Phase 2 of Food Truck Project
Business Concept	Modern food truck serving burgers, shawarma, fries, and cold drinks
Submission Type	Final submission-ready report with visual deliverables

Group Members

Name	Registration No.
Ahmad Yasin	L1F22BSAI0052
Abdul Rehman	L1F22BSAI0031
Eman Sarfraz	L1F22BSAI0034
Nouman Zakar	L1F22BSAI0048
Ali Hassan	L1F22BSAI0059

Prepared using the finalized official group logo and a premium brand system aligned with Assignment 1 research insights.

1. Executive Overview

This report presents the complete Phase 2 solution for the Zing & Zest Street Bites food truck concept. The objective is to convert the research direction from Assignment 1 into a market-ready brand system that includes a focused signature menu, a coherent visual identity, a justified pricing model, a competitor-based positioning map, and a customer journey designed for speed, hygiene, and repeat purchase. The concept is built for university students, young professionals, and value-conscious urban customers who want bold flavor, visible cleanliness, and an efficient service experience.

Key Deliverables Completed

Deliverable	What is Included	Why it Strengthens the Project
Menu Card	7 core items, 5 combos, 10 supporting items	Shows product architecture, pricing logic, and customer-facing clarity
Brand Identity Sheet	Final logo, color palette, typography, uniform direction, truck theme	Makes the concept look professionally branded and memorable
Pricing Table	Penetration pricing with item-by-item rationale	Shows commercial thinking and customer-value alignment
Positioning Map	Comparison against 4 competitor categories	Demonstrates strategic market placement
Customer Journey	Awareness-to-feedback service flow	Proves that the concept is designed around experience, not only food
Packaging Mockups	Burger box, wrap sleeve, fries cup, drink cup, carry bag	Creates a realistic and submission-worthy brand system

Strategic Direction

- Chosen business model: premium-looking but student-friendly food truck with strong brand recall, high visual hygiene, and fast-casual service.
- Chosen pricing approach: penetration pricing to secure first trial, build repeat purchase, and remain competitive around campus and city hotspots.
- Chosen target: students as primary market, employees as secondary market, and family visitors as tertiary market.

2. Product Design and Menu Architecture

The menu has been designed around speed, familiarity, and margin discipline. Instead of creating an overcrowded list, the food truck uses a focused menu architecture built on high-demand fast-casual items that can be prepared consistently and served quickly during peak periods.

2.1 Signature Menu Structure

Category	Item	Role in Menu Strategy
Burger	Zing Classic Burger	Entry-level signature burger with strong repeat-buy potential
Burger	Smoky Grill Burger	Premium burger upgrade with better margin
Shawarma	Zesty Chicken Shawarma	Fast-selling handheld meal for students
Shawarma	Double Bite Shawarma	More filling option for bigger appetite and upsell
Fries	Plain Fries / Masala Crunch Fries	Add-on category that increases basket size
Fries	Loaded Zing Fries	Shareable, visually attractive, premium side
Drink	Regular / Large Cold Drink	Essential complement to burger and shawarma combos

2.2 Combo Logic

Five combo offers were created to simplify decision-making, increase order value, and match student budget expectations. The Student Combo and Wrap Combo target fast lunch demand; the Loaded Combo pushes premium purchase; the Double Deal and Friends Combo are designed for paired and group consumption.

2.3 Menu Card

The following menu card was prepared as a customer-facing visual deliverable. It uses the approved logo, aligned color palette, and clean category structure for better readability at the truck window and in digital promotion.

Zing & Zest Street Bites - Menu Card

Signature food truck menu for Assignment 2 - University of Central Punjab

Fresh. Fast. Full of Flavor.

All prices in PKR

| • Ice Cream Soda | 220 | • Party Fries Bucket | 650 |

Brand theme: premium fast-casual, student-friendly pricing, visible hygiene, bold flavor identity.

Figure 1. Final menu card prepared for Assignment 2 deliverables.

3. Brand Identity System

The brand system translates the research insight into a consistent visual identity. The name, logo, tagline, color palette, tone of voice, truck exterior, staff appearance, and packaging applications were designed to make the concept look premium, youthful, hygienic, and memorable.

3.1 Identity Principles

- Logo purpose: instant recall, strong street visibility, and repeatability across truck, packaging, menu cards, and digital media.
- Color purpose: orange for heat, appetite, and excitement; charcoal for trust and premium structure; teal for freshness and beverage balance.
- Typography purpose: bold geometric heading style with clean body text for clear, high-speed reading from a distance.
- Uniform purpose: black polo, orange apron, branded cap, visible gloves, and neat service appearance to reinforce hygiene perception.

Figure 2. Brand identity sheet with palette, uniform direction, and primary logo use.

Food Truck Concept Board

Visual direction for the Zing & Zest Street Bites truck exterior

Exterior Palette

Warm white truck base with orange brand band, charcoal lower trim and teal freshness accents.

Brand Promise on Truck

Front fascia, side order window and rear panel should consistently display the logo, tagline and best-selling combo lines.

Service Window

High-visibility menu board, clean prep counter, gloves, tissue dispenser and digital payment QR at eye level.

Night Presence

Add soft warm LED strip around the menu window and under-roof edge for an inviting campus-evening look.

Figure 3. Truck concept board showing side branding direction and service-window layout.

4. Pricing Strategy and Pricing Table

The selected pricing model is penetration pricing. This approach is appropriate because the truck is entering a competitive fast-food space where students are highly price-sensitive yet still expect visible quality and hygiene. Penetration pricing allows the brand to win first trial, build daily habit, and compete strongly against low-end stalls while still appearing more organized and trustworthy.

4.1 Why Penetration Pricing Fits This Concept

- It attracts the primary segment of students without weakening the premium look of the brand.
- It improves conversion on combo meals, which are easier to sell than individual customization-heavy orders.
- It positions the truck between low-cost stalls and more expensive outlet-based competitors.
- It supports high-volume campus demand where affordability and speed matter more than luxury pricing.

Figure 4. Pricing table with item-level logic and strategic purpose.

Figure 5. Pricing highlights for major items and combo anchors.

5. Positioning Map

For positioning, the brand is mapped against four common competitor categories rather than one single named outlet. This makes the analysis more academically useful and easier to defend in class because the comparison is based on market type: canteen, local stall, standard burger outlet, and premium café.

5.1 Positioning Statement

Zing & Zest Street Bites is positioned as a medium-price, high-quality, high-hygiene food truck that offers more trust, structure, and brand value than low-end stalls while staying more affordable and flexible than premium cafés.

Figure 6. Competitor positioning map based on price versus perceived quality and hygiene.

5.2 Interpretation

- Campus canteen remains low in both price and perceived quality; it competes mainly on convenience.
- Local shawarma stalls compete on speed and low price but often lack brand trust and presentation consistency.
- Standard burger outlets may offer better structure but normally cost more and have less mobility.
- Premium cafés score high on quality and environment, but they are expensive for everyday student use.
- Zing & Zest Street Bites is intentionally placed where value, hygiene, speed, and brand identity meet.

6. Customer Experience Design

The customer journey was designed to remove friction and make the food truck feel organized from first view to repeat purchase. The service model emphasizes visual cleanliness, easy menu choice, quick payment, short waiting time, and post-purchase engagement.

Figure 7. Service journey from awareness to feedback and retention.

6.1 Experience Design Priorities

- Clear window ordering and a readable menu board reduce hesitation at peak time.
- Visible gloves, tissues, and neatly packed sauces improve the hygiene signal before the first bite.
- Digital payment support speeds the queue and fits student payment behavior.
- Instagram tagging, QR-based feedback, and combo offers help convert one-time buyers into repeat customers.

7. Packaging Mockups

Packaging was treated as part of the brand experience rather than a simple carrying material. Each packaging piece reinforces the logo, color system, and premium-but-accessible positioning of the truck.

Packaging Mockups

Conceptual packaging system aligned with the approved Zing & Zest Street Bites logo

Burger Box

Matte black clamshell with top logo stamp and orange side band.

Shawarma Wrap Sleeve

White wrap paper with repeating mini logo pattern and brand band.

Fries Cup

Tall orange cup with dark charcoal base and front logo.

Cold Drink Cup

Branded beverage cup with teal freshness accents.

Carry Bag + Stickers

Delivery bag, sealing sticker, and tissue brand mark.

Mockups are conceptual brand applications prepared for Assignment 2 deliverables.

Figure 8. Conceptual packaging mockups prepared for the final deliverables.

8. Truck Mockup Prompt Pack

A dedicated prompt pack has been prepared to generate high-end AI mockup images of the food truck using the approved official logo. The prompt pack is included as a separate text file in the submission ZIP. It contains multiple scenarios so the group can create investor-style visuals, presentation boards, and social-media launch scenes.

Included Prompt Scenarios

- Hero exterior mockup with 3/4 perspective and premium campus-street setting
- Clean side elevation branding mockup for presentation and truck-wrap planning
- Night service scene with LED menu glow and customer interaction
- Truck + packaging commercial mockup set for portfolio slides
- Festival / university event version with queue setup and branded flags

Best Use Instruction

Upload the official logo first and instruct the image tool to use the logo exactly as provided without changing color, text, or tagline. The truck should remain uncluttered, premium, and brand-consistent.

9. Final Conclusion

Assignment 2 transforms Zing & Zest Street Bites from a research-based idea into a realistic and investor-ready food truck concept. The product range is focused, the branding is memorable, the pricing is justified, the positioning is strategically clear, and the customer experience is intentionally designed to create trust and repeat business. As a final academic submission, this package demonstrates not only creativity but also practical marketing logic, operational thinking, and brand coherence.

This document is supported by separate visual assets and a truck mockup prompt pack included in the ZIP deliverable.
